THE EPHEIOLOGY PROJECT

We are at a critical juncture in our work. After six years focusing on church planting movements, we have planted approximately 166,000 new house churches across 48 countries. We recognize that attrition rates in church planting movements are high. In order to adequately resource national leaders to ensure success and sustainability, we focus on leadership development that is discovery based and movement centric. Alongside of multiplying church planting movements, our long-term goal is the maturation of believers, leaders, and healthy house churches.

Project Description

The vision for the project is to glorify God by multiplying mature followers of Jesus Christ who will faithfully lead cascading movements of churches. We will achieve the multiplication of mature believers through leadership development training seminars as well as print, video, and audio mediums. The development of a globally accessible platform will assist in resourcing and equipping national leaders to train movement catalysts in six gateway languages (Arabic, French, Hindi, Nepali, Spanish, Turkish).

Expected Project Outcomes

Based on our 2017-2020 training result of 300,000 national believers equipped to start indigenous churches, we believe we have the capacity to go to the next level and equip 25,000 movement catalysts and resource them to multiply trainers to train additional trainers with the focus on maturing church planting movements. We expect the following three outcomes in 2020-2021:

1. Work with national leaders to create culturally appropriate leadership development resources in six gateway languages focused on empowering movement catalysts through discovery learning.
2. On Site Seminars – Three training seminars in six gateway language locations will focus on training key national movement catalysts who will train an estimated 3,645 trainers to multiply additional trainers. The seminars will be discovery learning based with an emphasis on doing theology in community to ensure rootedness in the culture and fidelity to the Christian faith.
3. Production of globally accessible media with special attention on oral preference learning that will enhance and contribute to facilitating the ongoing leadership development of trainers of trainers and resource majority world missionaries.

Measurements

Our key measurement for 2020-2021 is equipping 25,000 movement catalysts with leadership development skills and competencies to train trainers who will train others.

Total Project Cost

Total project cost is \$36,000 for six gateway languages (\$6,000 per language).
